Re: SUBMISSION ON ARTHUR'S WAY

Maynooth Cycling warmly welcomes the proposal to develop Arthur's Way for cycling. However, in considering the impact of the proposed greenway, the Statement accompanying the Part 8 documentation should have referred to how Waterway Ireland's requirements in relation to width and surfacing will adversely impact on the success of the proposed scheme.

Also, while cycling has the potential to significantly impact on traffic congestion, public health and climate change, the impact of the proposed scheme on the above will be insignificant due to the minor change, if any, in modal split for cycling in the county.

Deirdre McGowan,
Secretary
